PermaShape™ Architectural Shapes by Perma “R” Products™ can turn a building’s ordinary exterior finish into an extraordinary work of art. From simple to ornate, PermaShape™ will give construction projects that special touch of beauty and it will stand out from the crowd with the look of handcrafted work. Our automated, precise cutting technology assures that the specified shapes will exceed all expectations. Our fabricated shapes are manufactured with the highest quality Expanded Polystyrene (EPS) foam with, or without, a factory applied durable base coat and can be specified with confidence for innovative and distinctive applications.

PermaShape™ is the right choice when you need architectural shapes for residential or commercial projects. Many Exterior Insulation Finish System (EIFS) manufacturers use Perma “R” flat board and shaped insulation to complete their projects with beautiful and professional results.
