

ProFeltPlus™

Synthetic Roofing Felt

*A better choice
than #15 asphalt felt*

#1. up to 4 x Lighter

You do the math!

5 rolls ProFeltPlus™ = 50 squares = 110 lbs.

12.5 rolls #15 felt = 50 squares = 450 lbs.

Net Savings... (drum roll) 340 lbs!!

Ask your "back" which one it prefers.

#2. up to 20 x Stronger

ProFeltPlus™ is much stronger than #15 felt. So blow offs are a thing of the past. It's mechanically nailed adhered using less fasteners per square than conventional felts. ProFeltPlus™ is an ideal replacement for #15 felts.

#3. up to 2.5 x More Coverage

ProFeltPlus™ covers more than your typical #15 felt. Try 2.5 times more! What does that mean? With up to 4 times less weight and 2.5 times more coverage than traditional felt, that means less time lugging rolls up ladders, and more time installing.

#4. Slip Resistant Surface

ProFeltPlus™ is coated on both sides with a special non-woven fabric laminated to the top side which provides a secure walking surface. Your foot will hang on to every step.

#5. User Friendly

ProFeltPlus™ is light weight easy to handle, will not support mold growth, rot, or dry out as it contains no asphalt. It's also 100% recyclable.

#6. UV Resistant

ProFeltPlus™ won't break down when exposed to UV rays, unlike #15 asphalt felts.

**FOR USE
AS A REPLACEMENT FOR #15 ASPHALT FELT**
