20-YEAR SYSTEM WARRANTY

Perma R Products® provides a 20-year system warranty when installing Perma R building wraps in combination with Perma R tapes.*

Perma R building wraps can be installed over wood-based, foam insulative, or fiberboard sheathing, exterior gypsum board, or directly over studs if not using continuous sheathing. Install building wrap with the printed side facing out, in “shingle-lap” fashion, with the higher piece lapped over the outside of the piece below. All horizontal overlaps of building wrap must be at least 2” (4” is recommended) and vertical overlaps must be at least 6”. Sealing seams with Perma R 1.85” construction sheathing tape is recommended.

Please refer to our Housewrap Installation Guide on our website for more detailed instruction.

LOOKING TO PROMOTE YOUR BRAND?

In Construction, house wrap can sit on the walls of a job site for an extended period of time. How many people do you think pass by and glance at it? A lot, that's how many! Take full advantage of house wrap and advertise a brand while construction is underway with custom logo printing by Perma “R” Products®.

Please reach out for more information including options, minimums and pricing.
